ProCreate Putty

Reviewed by Mike Falcigno

Amazing Figure Modeler Magazine, Issue 39

- ✓ "...significantly less sticky than the competition."
- ✓ "Compared to Green Stuff it is softer in the mixing stage...easier to manipulate...smoothes out much more evenly."
- ✓ "Many epoxy products are much more gritty in texture, ProCreate has a much finer grain - perfect for sculpting both organic and machined structures."
- ✓ "The opaque gray color is very easy on the eyes and allows for clear visibility when adding fine detail."
- ✓ "...holds very tight detail and machines quite well."
- ✓ **"For anyone who enjoys working in smaller scales I can honestly say that in my recent test, ProCreate beats Milliput, Green Stuff and Magic Sculp hands down in terms of workability, texture and final shore hardness."**
